DETAILED ACTION

Allowable Subject Matter

Claims 1-2 are allowed.

The following is an examiner's statement of reasons for allowance:

Referring to claim 1, the Moore reference (US Patent Pub. 2003/0099370 A1) discloses a method for matching hearing aids to the individual requirements of a patient with impaired hearing in realistic situations, comprising the steps of: passing sound example and scene which corresponds to said sound example visually to said patient at the same time (Moore, abstract), in order that a visual impression can be used for assessment of the acoustic experience by said specialist for matching a hearing aid to a patient's individual requirements (Moore, abstract). The Moore reference taken alone or in combination with another reference does not disclose or fairly suggest a method for matching hearing aids with the steps of providing two monitors, one for a specialist and one for said patient, a computer and at least one speaker where said computer supplies said two monitors with a video sequence and said speaker with a sound example as recited in claim 1.

Claim 2 depends on claim 1.
